

MAKE ZÜRICH  
GREEN AGAIN

## OUR GOAL

To develop a portable, compact data collection unit (temp and humidity) that gardeners can easily pickup and place in the greenhouse they choose in the Sukkulentensammlung

H  W

**Stadt Zürich**  
Grün Stadt Zürich

# WORKING TOGETHER WITH GRÜN STADT ZÜRICH

Mr Jonas Heimgartner - stakeholder Stadt Zürich

Mr Schneider - chief gardener at Sukkulentensammlung

# SUKKULENTENSAMMLUNG AT NIGHT

Checking TTN LoraWAN coverage

Check out the  
high tech pins!!!

# DESIGNING THE CASE

- Easily portable, usable and weatherproofed
- Openings for mechanical power switch
- Micro USB charger connection
- Antenna RMA connector

# DESIGNING THE FUTURE CASE

3D printed

# APPLYING THE HARD WORK

## MAIN BENEFITS FOR GRÜN STADT ZÜRICH - SUKKULENTENSAMMLUNG

- Track data to assess the evolution of particular Sukkulentsammlung areas
- Sensors to trigger alarms at particular situations
- Save costs on labour and improve maintenance optimisation
- Predict future patterns based on the collections of data

# BACKEND

Make Zurich Green Again

Live View

Historic Data

Temperature

20.26 C

Humidity

37.06 RH(%)

Battery

5 V

Last update: 2017-02-04T14:47:46.484Z

## Graph

# FURTHER APPLICATIONS

## PERSONAL USE

- Control garden data while travelling
- Know what to do with your plants and when to do it
- Easily share information with professionals

(assessments for garden designs, correct maintenance, etc...)

Sukkulentensammlung
